

BDI turns to **Michael Management** for engaging SAP Training and delivers critical SAP skills to its users.

Company: Bearing Distributors Inc
Industry: Industrials

SITUATION

BDI, one of the largest international distributors of bearings, transmission components and precision machined parts, was implementing SAP with the help of outside consultants.

The company needed an easy-to-use way to deliver critical SAP knowledge to its SAP users in various locations and time zones. Additionally, their users requested interactive training that was available on-demand and in small doses to allow the training to be taken during regular work schedules.

SOLUTION

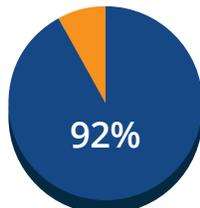

BDI subscribed to Michael Management's SAP training platform to deploy engaging online SAP training lessons to its SAP users, including hands-on simulations and online quizzes.

"We have found the MMC SAP training solution to be very effective with onboarding of new employees but also for the cross-training of our more experienced SAP users as well.", said Gary Neuman, Director of Information Technology at BDI.

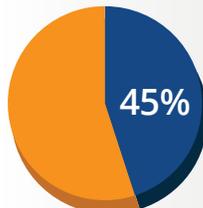

RESULTS

89 hrs.
of SAP
training per
student

92%
Average SAP
certification exam
score

45%
cost savings
over traditional
classroom training

QUOTE

“Our SAP users love the new MMC SAP training system. We wanted something easy to use and MMC delivered it.”

Gary Neuman

Director, Information Technology
